

Case Study

Kingshott School

Macadam Car Parks

Macadam Roadway

Macadam Footpaths

Kingshott School has an ongoing commitment to provide the very best facilities for its children. The school has some four hundred pupils between the ages of 3 and 13, and prides itself on its commitment to provide an outstanding co-educational learning experience.

As part of a wider design & build sports facility & infrastructure contract, Slatter Surfacing & Civils have created two new car parking facilities for the school. These are linked by a new internal roadway and roundabout supplemented by pedestrian footpaths and hard standings.

All the works including excavation, drainage, foundations and kerbing were completed by the Slatter in-house surfacing & civils team. The macadam surfaces were machine laid by the company's own Vogeles pavers.

Peter Fowler, Contracts Manager, together with Dave Wills, Site Supervisor, lead and managed delivery of this major new resource for the school.

S&C Slatter was also responsible for building a full size artificial turf hockey pitch and cricket practice area, and refurbishing existing tennis courts.

Inclusive design and construction contract.

“ At Kingshott School, we encourage every child to be ‘the best I can be’. It has been a pleasure to work with S&C Slatter during the installation of our magnificent new sports infrastructure. Their professionalism and expertise resonated completely with our ethos, as they have delivered facilities which are clearly, ‘the best they can be’. Thank you from everyone at Kingshott School. ”

Mark Seymour, Headmaster, Kingshott School
